1. The drawings were received on 07 March 2006. These drawings are accepted.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. The application has been amended as follows:

IN THE SPECIFICATION:

the paragraph beginning at page 8, line 5 and ending at page 8, line 10 has been amended to read as follows:

Although the addition of aperture 448 moves the location of peak strain toward the preload bend as compared to the embodiment shown in FIG. 2, the aperture is sized such that a large majority of the peak strain region 466 is still located between the preload bend and rigid load beam section 440. In this region, damper 464 can be easily mounted onto the suspension so as to dampen vibrations in the areas of high strain energies.
